EDUCATION

Aditya College of Engineering and Technology, Surampalem

B. Tech in Artificial Intelligence & Machine Learning

2022 - 2026

CGPA: 7.0/10

EXPERIENCE

IDC INDIA - Ai intern [Link](#)

Jan 2025 – Mar 2025

- Developed ML models like ai vs human text analyser disease prediction system
- AI virtual teaching assistant with NLP for enhanced user interaction.
- Designed medical chatbot with Streamlit and Google Gemini API for prescription analysis.
- Currently working on My Court AI model to answer legal queries with data processing.

TECHNICAL HUB - Gen Ai Intern [Link](#)

May 2024 – July 2024

- Contributed to Machine learning. deep learning projects using OpenCV, and NLP.
 - Designed and implemented algorithms using statistical modelling techniques to improve accuracy, performance
 - Trained and deployed models including CNN and other models on AWS
 - Collaborated with a team of peers to develop innovative AI solutions for real-world applications.
-

TECHNICAL SKILLS

- **Programming Languages:** Python,
 - **Generative AI:** LLM's, Image/Text Generation, Lang chain, RAG, Fine tuning, n8n agents.
 - **Machine learning:** Model Building, Fine tuning, ML Ops, Computer Vision
 - **Additional Skills:** Deep learning, Data Processing
 - **Cloud platforms:** Amazon web services
-

AI-PROJECTS

MEDICAL AI AGENT | [VIEW](#)

[GitHub-Link](#)

- Built AI Medical Agent with Streamlit, Tesseract OCR, and **Gemini API** for prescription and symptom analysis.
- Created PDF reports with Report Lab and email delivery via SMTP for enhanced user accessibility.
- Designed intuitive UI, integrating text extraction from PDFs/images.
- Automated prescription analysis with Python and PyPDF2 for efficient healthcare insights.

COLD EMAIL GENARATOR |

[GitHub-Link](#)

- Built an AI-driven tool to automate personalized cold email generation for software service companies,
- Extracts key skills and requirements from job postings. And stores in vector data base then pass to **LLM**
- Lang Chain for web scraping, **Chroma DB** for semantic search, and **Llama 3.1** for generating tailored emails.
- Utilized Chroma DB for semantic search, enabling accurate matching of job requirements with engineer portfolios based on relevance rather than exact keywords.

MINIOR-PROJECTS

TEXT TO IMAGE GENARATOR | [GitHub-Link](#)

- This project is a simple GUI application built with Tkinter and FastAPI.
- Allows users to generate AI-generated images using the Hugging Face API.
- User inputs a prompt, and the system returns an image based on that prompt.
- Display generated images within the application

FINE-TUNING LLaMA-2 7B WITH LORA | [GitHub-link](#)

- This project explores fine-tuning Meta's LLaMA-2 7B Chat model using LoRA and 4-bit quantization
- This project shows how to fine-tune **LLaMA-2 7B Chat** on your own dataset using **LoRA**
- The goal is to adapt a large-scale LLM to, domain-specific datasets while keeping computational costs low.
- By leveraging parameter-efficient fine-tuning for efficient training on limited hardware

AI RESUME ANALYZER

- Built AI resume analyser with Gemini AI to calculate job description match % and identify missing keywords
- Developed Streamlit app with PDF text extraction for real-time resume feedback and optimization
- Automated keyword gap analysis and profile summaries to boost ATS performance
- Engineered end-to-end system from PDF processing to AI analysis for resume improvement

COMMUNICATION

Confident in both verbal and written communication, with the ability to clearly present ideas and collaborate effectively. Skilled in explaining complex concepts in a simple and understandable way. Experienced in delivering presentations and participating in team discussions to achieve common goals. Proficient in adapting communication styles based on audience needs.

CERTIFICATIONS

- **GOOGLE** Career Readiness - Associate Cloud Engineer Path [View](#)
- Generative AI Certified Professional by **ORACLE** Cloud Infrastructure [View](#)
- **ORACLE** Cloud Infrastructure 2024 Certified AI Foundations Associate [View](#)
- Gen AI Foundations by **DELL** Pearson [View](#)
- Artificial Intelligence Fundamentals by **IBM** Skills Build [View](#)

DIGITAL ACHIEVEMENTS

- Participated in an **AWS Deep Racer** session on autonomous vehicles and reinforcement learning [View](#)
- developed AI and deep learning applications using **NVIDIA Jetson Nano**, focusing on generative AI and edge [View](#)
- Actively enhancing skills through platforms like **Google Cloud**, and earning numerous Digital Badges [View](#)
